### **Stars: the Powerhouses of the Universe (all ages)**

Stars are the engines that fuel the universe, and every star has a story. Follow along and learn how they are formed, their beauty, and their destructive power. Explore the history of astronomy around the world.

### **Totality (all ages)**

This show provides a detailed look at eclipses, including what they are, how and when they occur, and the wonderful sights they create. Come explore what happens when you're plunged into the darkness of a total solar eclipse.

### **Habitat Earth (all ages)**

In the only Earth Science offering, learn how living networks connect and support life forms large and small. Discover what it means to live in today's connected world—from deep in the ocean to beneath the forest floor.

### **Earth, Moon & Sun (younger audiences)**

Journey along with Coyote, a character adapted from Native American oral tradition, as he explores the relationship between Earth and its neighbors. Native American stories woven through this show illustrate how we have long tried to understand our planet and the skies above us.

### **From Earth to the Universe (adult audiences)**

How has our understanding of the universe progressed in the last 100 years? Explore how technology has allowed us to observe new parts of space for the very first time.

### **Discover the Stars (all ages)**

Many of us have looked up at the stars in the sky and wondered. This exciting program takes viewers beyond a simple observation of the night sky and delves into the fascinating lives of stars.

If you have a love for the night sky join the West Kentucky Amateur Astronomers.

for more information, call 270-924-2243

### **The Little Star that Could (children/younger audiences)**

Little Star is born as an unnamed, average star, but he wants to be special. Along his journey, he learns what makes each star special and exactly what it takes to lead a solar system—and even discovers his name.

### **Laser Legends of the Night Sky (younger audiences)**

Join Aesop the Owl in a journey through Greek-mythology inspired stories of the constellations, including princesses, warriors, and even sea monsters. Explore the fight of good versus evil, death, honor, betrayal, and sacrifice themed in a way that is suitable for younger viewers.

**\*\*Warning:** Some flickering/dynamic light elements may not be suitable for light sensitive groups.

### **Traveling with Light (all ages, trends towards younger audiences)**

This show presents different scenarios that reveal the complexity of light and its direct influence on our planet. From the heat and light of the Sun to the evolutionary impact of fire, light plays a vital role.

### **Firefall (adult audiences)**

Have you ever enjoyed a meteor shower or wished upon a shooting star? Explore where meteors come from, what they are made of, past impact evidence and even possible future impact predictions.

### **Explore (all ages)**

Enjoy the story of humanity's fascination with stars, from ancient astrologers to breakthrough discoveries. Also learn how modern spacecraft navigate the skies.
